3. Results
4. Discussion

INTRODUCTION

Content slide

Schwarzschild black hole

$$(ds)^2 = -\left(1 - \frac{2M}{r}\right) (dt)^2 + \frac{1}{\left(1 - \frac{2M}{r}\right)} (dr)^2 + r^2 (d\Omega)^2$$

Additional information: https://en.wikipedia.org/wiki/Schwarzschild_metric

Sections and Slide numbering

- Opening a new section will automatically register the section title in the footer.
- First level headers correspond to slide titles that are placed in the header.
- Slide numbers are provided by default on content slides but not on section slides or image slides.

Hypotheses

H_0 – An uninteresting null hypothesis

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequi doleamus.

H_1 – An interesting hypothesis

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequi doleamus.

METHODS

Code

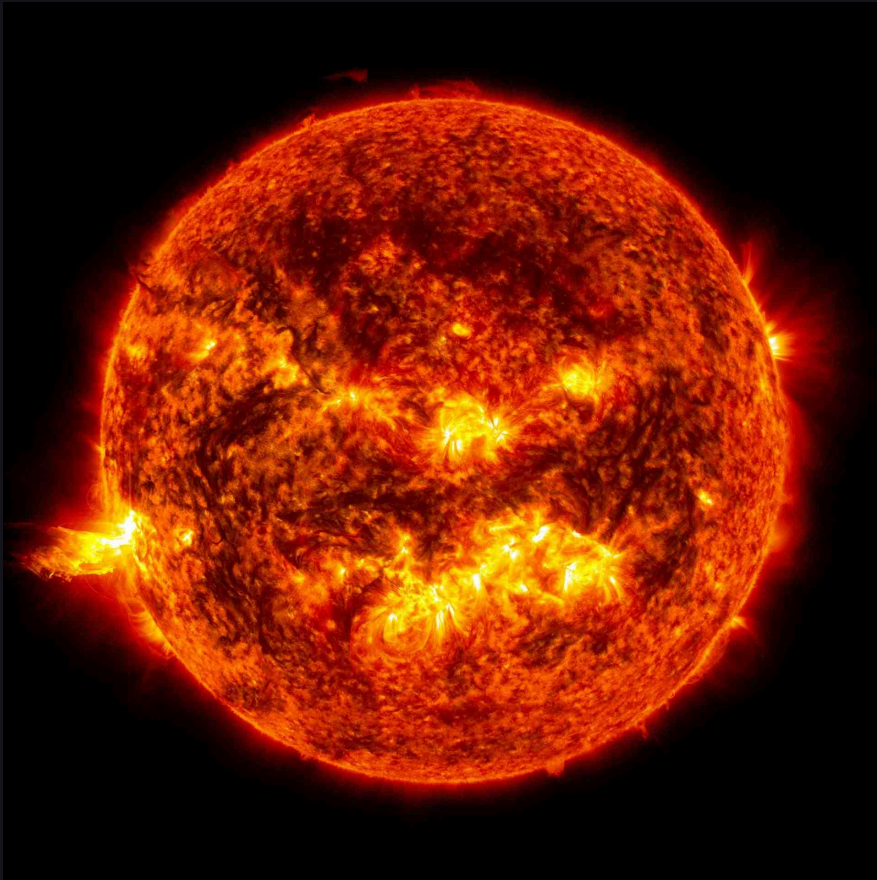

A Julia function to obtain the Fibonacci sequence recursively:

```
function fib(n)
    if n <= 1 return 1 end
    return fib(n - 1) + fib(n - 2)
end

fib(13)
```

RESULTS

Inverted content slide

The foreground and background colours can generally be inverted with `#show: invert-slide`.

DISCUSSION

A particularly important aspect

Focus slides can be used to **emphasize** a short but important message.

Thank you !
