

Line graph showing the percentage of APTEDs solved within a 1-second budget for three categories: Code, Scripting, and Config/data. The x-axis represents the whole-tree APTED wall-clock time in milliseconds (ms) on a logarithmic scale (1, 10, 100, 1k). The y-axis represents the percentage of APTEDs solved (0% to 100%). A vertical dashed line at 1k ms indicates the 1-second budget. At this budget, 53% of Scripting APTEDs, 47% of Code APTEDs, and 45% of Config/data APTEDs are solved.

Category	n	Percentage Solved at 1s Budget
Code	12,868	47%
Scripting	1,966	53%
Config / data	4,964	45%
